

Drones

Drones: An Epitome of Privacy Invasion and a Tool for Due Process Evasion

Abstract

- US developed drones after 9/11 attack
- Used to track down suspicious people
- Made citizens wary
- Drones are used in combat

Images

Introduction

- Specifically known as Unmanned Aerial Vehicle (UAV)
- Remotely Controlled or by used of on board computers
- Used in various fields and missions

Problem Statement

- Privacy invasion, intrusion to personal life
- FBI admitted the use of drones
- Drones are essential in taking down HVTs
- Bypassing of due process
- Drones are prone to hacking

Results and Discussion

- Drones are largely used by military
- Military had total control of drones
- Laws and regulations needed for drone use
- Privacy and due process above others

Conclusion and Recommendation

- Drone regulations need, even in military
- Everyone has a right to privacy
- Awareness and participation is key
- Regulations : No drones during non-wartime
